

## BOIL WATER NOTICE

**Loss of pressure in Village of Waterloo Water District for properties located at 4-56 West Elizabeth Street and 17-38 Center Street.**

### BOIL YOUR WATER BEFORE USING

Bring tap water to a rolling boil, boil for one minute, and cool before using. Or use bottled water certified for sale by the New York State Department of Health. Boiled or bottled water should be used for drinking, making ice, washing dishes, brushing teeth, and preparing food until further notice.

This Boil Water Notice applies to the Village of Waterloo water district for 4-56 West Elizabeth Street and 17-38 Center Street.

#### **What Happened ?**

At about 5:30am on September 24, 2026 the water system lost pressure due to a water main break. When water mains lose pressure it increases the chance that untreated water and harmful microbes can enter your water.

*Harmful microbes in drinking water can cause diarrhea, cramps, nausea, headaches, or other symptoms and may pose a special health risk for infants, some elderly, and people with severely compromised immune systems. But these symptoms are not just caused by microbes in drinking water. If you experience any of these symptoms and they persist, you should seek medical advice.*

#### **What is being done ?**

The waterline is being repaired on September 24, 2026.

It is likely that you will need to boil water for the next 3 days until the problem is fixed. You will be informed when tests show that you no longer need to boil your water.

For more information, please contact:

The Village of Waterloo at 315-539-9131 or the Seneca County Health Department at 315-539-1945.

*Please share this information with other people who drink this water, especially anyone who may not get this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
